**AHSC Continues to Move Forward**

Despite the challenges of limited resources, leadership at the Arizona Health Sciences Center remains focused on growing the vision and mission of AHSC in Tucson, Phoenix and beyond. Dr. J. Lyle Bootman, UA senior vice president for health sciences, offers an update on the work of many to advance the AHSC mission.

**New MRI Scanner a First for Arizona**

The Siemens' Magnetom Aera 1.5 Tesla MRI is part of a plan to establish the UA College of Medicine’s Department of Medical Imaging (formerly Radiology) as a national leader in medical imaging. The scanner was installed recently at The University of Arizona Medical Center – University Campus.

**MRI Goggles Reduce Anxiety for Pediatric Patients**

Donning Diamond Children's special MRI goggles – shaped like a scuba diver's mask – young patients who might be fidgety or anxious during an MRI procedure can focus their attention instead on "Finding

**Tucson Visitors Protected with New Sunscreen Option**

Visitors to popular Tucson-area attractions who might have forgotten their sunscreen can relax and enjoy the outing thanks to the Skin Cancer Institute at The University of Arizona Cancer Center and a grant from the UA’s

Nemo." Or another movie, TV show or musical entertainment.

Grant Supports Latinas with Breast Cancer

A researcher at the UA College of Nursing and The University of Arizona Cancer Center will study interventions to improve the quality of life for Latinas with breast cancer and their partners. Dr. Terry Badger was awarded a five-year, $1.3 million grant by the American Cancer Society for this work.

UA Researchers Aim to Predict Hip Fracture Risk

Hip fractures are a major contributing factor to disability and death in older women -- a problem that will become even more acute as the world’s population ages. That’s why UA engineers and public health professors are developing a sophisticated, ultimately Internet-based, computer model to identify those most at risk.

How Are We Doing with HIT?

Health Information Technologies are found to improve patient safety in some areas, such as medication safety, but it is not clear how health IT impacts patient safety overall. UA College of Pharmacy Associate Dean Phil Schneider served on the Institute of Medicine committee to report on HIT.
