Bringing Home a Telly
Congratulations to AHSC BioCommunications’ Erica Coleman and Larry McAllister. Their video, “Tragedy in Tucson: One Year Later,” is one of more than 13,000 entries submitted to the 33rd annual Telly Awards, and it was awarded a Bronze. Watch the video here.

New AHSC Scheduling System Launches
The new Health Sciences Resource Scheduling System at AHSC is in place. The system combines two room-scheduling programs into a single, online system for use in the scheduling of all classrooms, auditoriums and meeting rooms at the AHSC colleges, the BIO5 Institute and the Medical Research Building.

Students Re-Career through New Nursing Program
The UA College of Nursing has admitted 90 students to the new 15-month, Masters Entry Into the Profession of Nursing (MEPN) program. The MEPN program is the first of its kind in Arizona.

Autism and iPads
Can digital media help children with autism express themselves? A one-year grant from the Community Foundation of Southern Arizona is helping UA researcher Sydney Rice, MD, understand how Apple iPads may make a difference.

Pharmacy Grad Wins Virtual Poster

CDC Grant Funds
Competition

Erwin Lam, PharmD, Class of 2012, was the only winner of the Best Student and Resident Poster Award from the 2012 Virtual Poster Symposium of the American College of Clinical Pharmacy.

Minimally Invasive Laser Surgery for Epilepsy Treatment

Physicians at The University of Arizona Medical Center – University Campus recently became the first in the western United States to operate on an adult epilepsy patient with minimally invasive MRI-guided laser surgery – a safer, less invasive alternative to opening the skull and cutting out the brain tissue where the disorder originates.

Respirator Study

Respirators can help save lungs and lives in disease outbreaks, wildfires and other natural disasters – if they’re used correctly. Researchers at the UA Mel and Enid Zuckerman College of Public Health are using a $1.2 million grant to focus on community training in respirator use.
