AHSC Points Way to Health-Care Role for Arizona

As Arizona celebrates its 100th anniversary of statehood, a new direction in health care is developing at the University of Arizona’s Arizona Health Sciences Center. J. Lyle Bootman, PhD, ScD, UA senior vice president for health sciences, envisions the state once again becoming a health destination for the nation, with the UA and AHSC playing significant roles in this transformation. Please see video.

'Toward a Science of Consciousness,' April 9-14

The Center for Consciousness Studies at the UA Department of Anesthesiology brings together hundreds of scientists, philosophers, psychologists, experientialists, artists and students from more than 60 countries at its 10th biennial conference, "Toward a Science of Consciousness," April 9-14 in Tucson. In the opening session, "War of Worldviews," western and eastern approaches meet in exploring great philosophical questions, such as the nature of reality and our place in the universe.

Dr. Katsanis Named BMT Program Director

KEYS Opens Doors to Science Careers
Emmanuel Katsanis, MD, recently named program director of The University of Arizona Cancer Center’s Blood and Marrow Transplantation program, will guide the integration of the adult and pediatric BMT programs, while maintaining separate clinical services for adult and pediatric patients.

Global Health Institute Launches New Research Program

Third-year medical students from Saudi Arabia learned about biomedical and public health research in a new program through the Global Health Institute at the UA Mel and Enid Zuckerman College of Public Health in collaboration with the UA College of Medicine – Phoenix.

Researchers Study UA Invention to Treat Leading Cause of Blindness

Each year, more than 200,000 people in the United States are diagnosed with Wet Age-Related Macular Degeneration, a leading cause of blindness in Americans age 60 or older. There is no known cure for the disease, but a device invented by UA Radiation Oncology Professor Russell Hamilton, PhD, may change the way it is treated.
