UA Department of Surgery to Study Use of 'Smart' Socks to Prevent Amputations

Can something as simple as putting on a pair of socks help save the limbs and lives of people with diabetes? The University of Arizona Department of Surgery’s Southern Arizona Limb Salvage Alliance (SALSA), the Interdisciplinary Consortium on Advanced Motion Performance (iCAMP) and Hamad Medical Corporation (Doha-Qatar) recently were awarded more than $2 million in research grants from the Qatar National Research Fund to study the use of new technology incorporated in specially made socks.
