Phoenix Biomedical Campus – Phase Two

Health Sciences Education Building

- Education building for the University of Arizona College of Medicine – Phoenix, the UA Colleges of Pharmacy and Public Health and Northern Arizona University’s health-related programs.
- The Health Sciences Education Building will include classrooms, a state-of-the-art simulation center, pre-clinical training suites, anatomy laboratories, library and learning resource center, student spaces (e.g. student government, lounges) and faculty offices.
- The building is sized at 268,000 GSF

Arizona Biomedical Collaborative 2

- Arizona Biomedical Collaborative 2 will accommodate approximately 300 physicians and scientists.
- This facility will focus on disease-based translational research in the areas of cancer, neuroscience and metabolic biology.
- The estimated size of ABC 2, including the research cores and other support, is 254,000 GSF

Campus Population and Occupants

- At the completion of phase two, the campus is expected to support a population of more than 3,000 graduate and undergraduate students in the health sciences and scores of faculty.

Economic Impact

- The economic impact of the Phoenix Biomedical Campus is estimated at more than $2.1 billion a year at full build-out (the equivalent of more than four Super Bowls a year!).
- Academic health centers are one of the strongest economic engines in the country. Cities with academic health centers have higher wages, lower unemployment and increased tax revenues.
