Overview
The University of Arizona Medical Center – South Campus is part of The University of Arizona Health Network, the state’s premier academic medical system with hundreds of physicians, 6,000 employees, two hospitals and dozens of clinics in Southern Arizona. The teaching hospital and physician offices at UAMC – South Campus, 2800 E. Ajo Way, are managed by The University of Arizona Health Network under a long-term agreement with Pima County. Its mission is Advancing Health and Wellness through Education, Research and Patient Care.

History
Pima County opened Kino Community Hospital in 1977. In 2003, University Physicians Inc. assumed management of all outpatient medical offices at Kino, and in 2004 entered into a long-term lease to operate the hospital for Pima County.

With the 2010 merger of University Physicians Healthcare and University Medical Center, the hospital became known as The University of Arizona Medical Center – South Campus.

South Campus was designated a “senior-friendly” hospital in 2011, receiving the prestigious NICHE (Nursing Improving Care for Healthsystem Elders) designation from the Hartford Institute of Geriatric Nursing.

South Campus has been designated a provisional Level III trauma center by the Arizona Department of Health Services and as a Cardiac Receiving Center by the Bureau of Emergency Medical Services and Trauma System's SHARE (Saving Hearts in Arizona Registry and Education) Program. We’re proud to be a part of The University of Arizona Health Network, expanding the quality and variety of care for Southern Arizona while training future generations of physicians and other healthcare professionals.
