Mission: Advancing health and wellness through education, research and patient care.

- The University of Arizona College of Medicine – Tucson admitted its first class of 32 students in 1967.
- The College has 20 departments – five basic science and 15 clinical science – and 14 centers, dedicated to specific areas of research, clinical care and teaching: Arizona AIDS and Education Training Center, the University of Arizona Arthritis Center, Arizona Center on Aging, Arizona Center for Integrative Medicine, the Arizona Emergency Medicine Research Center, the Arizona Hispanic Center of Excellence, Arizona Respiratory Center, Arizona Simulation Technology and Education Center, the Steele Children's Research Center, the UA Sarver Heart Center, Sonoran UCEDD and the Valley Fever Center for Excellence. The VIPER Institute (Venom Immunochemistry, Pharmacology and Emergency Response) also is under the college's umbrella.
- Research concentrations include biomedical imaging, cancer, diabetes, heart disease and neurological disorders. Total annual research funding for the College has grown from $345,000 in 1967 to nearly $141 million in 2014.
- Medical students and residents receive instruction from 1,285 faculty members: 713 full- and part-time salaried, 105 affiliate and 430 associate (volunteer) faculty members.
- Each year, the UA College of Medicine – Tucson admits 115 students. The college currently has 702 medical students. The college has three dual-degree programs in MD-PhD, MD-MPH and MD-MBA. The college also has 1,605 undergraduates (pre-physiology and physiology majors in the UA Department of Physiology).

• The UA College of Medicine – Tucson Graduate Medical Education Program oversees 52 ACGME-accredited residency programs in all major specialties and subspecialties. More than 600 residents and fellows are trained at more than 35 sites in Tucson, including the college’s primary teaching hospitals, Banner – University Medical Center Tucson and Banner – University Medical Center South, and other major participating sites, including the Southern Arizona VA Health Care System and Tucson Medical Center. The UA College of Medicine at South Campus Graduate Medical Education Program oversees six ACGME-accredited residency programs (medicine, psychiatry, ophthalmology, neurology, emergency medicine, family medicine) and one fellowship in medical toxicology. Approximately 110 residents are enrolled in FY 2014-2015. These residents/fellows are based primarily at Banner – University Medical Center South, with rotations at more than 20 sites throughout the state, including the Southern Arizona VA Health Care System and various Indian Health Service locations.
