POWER LIST:
THE 25 MOST POWERFUL PEOPLE in VALLEY HEALTHCARE

APRIL 2016
MAESTROS MUSIC

ELIZABETH HOLMES, CEO, THERANEX
Age: 52
A founder of Theranos, a laboratory diagnostics company that developed an inexpensive, near-bloodless protocol for blood tests, the Stanford University dropout is nationally recognized as a visionary disruptor to the medical establishment. (Along the way, she also became America's youngest female billionaire.) Although her offices are in Palo Alto, Holmes staged the major implementation for Theranos in Arizona and is rumored to own a home in Scottsdale's ultra-high-dollar Silverleaf community. Following a federal inspection that found flaws at its California laboratory, "Theranos'" lucrative long-term partnerships with Walgreens is on hold, raising the question of whether Holmes, listed as one of 2015's 50 Most Powerful People in Healthcare by Becker's Hospital Review, will rise to the No. 1 spot on the Valley's healthcare power list... or disappear from it completely.

DAVID ALLAZETTA, P.C., GENERAL CONSULTANT AND DIRECTOR OF THE UNIVERSITY OF ARIZONA, EFFECTS AND HEALTH IN ARIZONA AND NEW MEXICO
Age: 68
Allazetta, a former VP of sales and marketing for United Healthcare's Nevada operations, just settled into his new job in Phoenix this year—his wife is still behind in Las Vegas, where she's finishing up her last year at a high school counselor before joining him here—but the scope of United's reach in Arizona guarantees the fitness and cross-training enthusiasm will be assuming a power position. United Healthcare Arizona now has 1.7 million members, the people. The growth of its Southwest market forced the global UnitedHealth Group to split the four-state territory formerly overseen by Beth Soberg in two, with Soberg moving to San Diego and Wyoming and Allazetta overseeing Arizona and New Mexico.

ROBERT SPETZLER, M.D., CHAIRMAN, DEPARTMENT OF SURGERY AND DIRECTOR OF BARRON NEUROLOGICAL INSTITUTE
Age: 71
A world-renowned neurosurgeon—and arguably Arizona's most famous clinician, next to Tucson's inflammation and aging expert Andrew Weil—the German-born Spetzler has received multiple awards for his clinical mastery and authored more than 300 articles on the subject. In 1991, he sent shockwaves through the medical world for inducing clinical death in a woman suffering from a dangerous cardiac arrhythmia, an operation and then successfully bringing her back after its removal, a technique now known as deep hypothermic circulatory arrest. Since assuming the post of the 50th Director in 1997, Spetzler has steered its international reputation, attracting patient referrals and healthcare professionals from all over the world.

17. BENTLEY (Ben) BORROW, M.D., MEDICAL DIRECTOR, BURKETT MEDICAL CENTER, AND T.C. AT THE ARIZONA DEPARTMENT OF HEALTH SERVICES (ADHS)
Age: 56
If you or a loved one suffer cardiac arrest and manage to live, it might have something to do with Bobrow. The EMS (Emergency Medical Services) pro, once featured in a 1998 episode of the medical reality series "Emergency: Life in the E.D.," has done extensive systems work in the pre-hospital world to improve health outcomes in Arizona including cardiac arrest, stroke, traumatic injury and traumatic brain injury. For several years he has also been leading the charge with the ADHS's SHARE program, which combines all links in the "chain of survival" to get the right patient to the right hospital in the right time. Hitchcock-like actions in regard to EMS dispatch training have been adopted by the Clinton Global Initiative and are now being implemented internationally.

18. ALAN NELSON, CHAIRMAN AND CEO, VISIONGATE INC.
Age: 66
Nelson heads up VisionGate Inc, a Phoenix-based biotech company that offers a lung cancer detection test and recently secured worldwide exclusive rights to a drug designed to prevent the deadly disease. Nelson teamed up with researchers at the University of Colorado Anschutz Medical Center, who have discovered that the drug fipronil can be instrumental in reducing disparities in health care and reducing the defense drug that currently is used to treat various lung diseases, such as pulmonary arterial hypertension. Nelson was also named as one of Phoenix Business Journal's Health Care Heroes for 2015.

19. NATHAN LAUFFER, M.D., PRESIDENT, ARIZONA MEDICAL ASSOCIATION
Age: 56
Perhaps the Valley's most well-connected doc, Lauffer comes to his one-year term as president of the AMA after serving as a member since 2010. He's the founder and medical director of the Heart & Vascular Center of Arizona in Phoenix, where he practices as a cardiologist, and has been an integral part of the Valley's cardiovascular research community for the past three decades, serving on a long list of cardiology-related boards and associations and as principal investigator on dozens of hospital and office-based studies. The many hundreds of peer endorsements on his LinkedIn page suggest Lauffer is also pretty well-liked in the community—an additional prerequisite for his current post—as does his status as PHNExs' all-time most decorated Top Doc.

20. JOE "SKIP" GARCIA, SENIOR VICE PRESIDENT FOR HEALTH SCIENCES, ARIZONA HEALTH SCIENCES CENTER
Age: 66
In his first years as an assistant professor of medicine at the University of Texas Health Center, Garcia, a pulmonary specialist, helped open the first hospital in El Paso, Texas. Later, as director of pulmonary and critical care medicine at Johns Hopkins, he helped the division receive top national ranking.
SUBHAKAR MUTHALA, MD, MPH
RADIATION ONCOLOGY/BRACHYTHERAPY
Dr. Muthala is the medical director of radiation oncology at The University of Arizona Cancer Center at Dignity Health St. Joseph's Hospital and Medical Center and serves as a Professor of Radiation Oncology at The University of Arizona COM - Phoenix. He specializes in genitourinary cancers, pelvic tumors, skin cancers and clinical expertise in brachytherapy. Dr. Muthala earned his medical degree from Texas A&M University College of Medicine and a master's degree in Public Health from Columbia University. He completed a brachytherapy fellowship at Brigham and Women's Hospital, Harvard Medical School and is board certified in radiation oncology by the American Board of Radiology, with a board subspecialty certification in brachytherapy. He is one of the country's experts in brachytherapy, has authored several publications and lectures internationally.

STEVEN L. MYERTHAL, MD
ORTHOPEDIC HIP & KNEE SURGERY
Dr. Myertall is an internationally fellowship-trained and board-certified specialist in hip and knee reconstruction, including Stryker Robotic Arm Assisted Surgery for hip and knee replacement surgery and the direct anterior approach for hip replacement surgery. He was recognized by "Best Doctors in America®" in 2010 and 2011, and named a "Top Doc" by PHOENIX magazine in 2010. Dr. Myertall completed his fellowship training in hip and knee replacement surgery at Mount Sinai Hospital in Toronto, where he received the Sopram Humanitarian Award. He completed his orthopedic residency at the University of Toronto, and earned his medical degree and two bachelor’s degrees at the University of British Columbia. Dr. Myertall is active in academic medicine, and lectures frequently to community groups and orthopedic associations, and at academic symposiums. He is a member of the American Academy of Orthopedic Surgeons and a fellow of the Royal College of Surgeons of Canada.

GOVARDHANAN NAGAIHA, MD, MS
MEDICAL ONCOLOGY & HEMATOLOGY
Dr. Nagaiha earned his medical degree from MGR Medical University, Chennai, India. He completed a dual residency at Mercy Catholic Medical Center, Darby, (Philadelphia) Penn. and National Health Service, United Kingdom followed by his fellowship at West Virginia University. His expertise includes breast, liver, stomach, colon, lung, kidney, bladder and prostate cancers, as well as myeloma, lymphoma and benign hematological problems. Dr. Nagaiha states his philosophy is, "I believe being an oncologist is a privilege that is not to be taken lightly. I strive to provide, evidence-based care that is appropriate to my patient's particular problem, recognizing and respecting individual patient's wishes. I take a multidisciplinary approach to care including alternative therapies that have been shown to be effective."

AHMAD NIZAM, MD
NEUROLOGY
Dr. Nizam is a board-certified fellowship-trained neurologist specializing in neurological patient care with The Core Institute's partnered hospitals. He received his fellowship training in clinical neurophysiology at Vanderbilt University in Tennessee, and completed his residency training at the Robert Wood Johnson Medical School in New Jersey. Dr. Nizam earned his medical degree from the University of Damascus in India. He has participated actively in national neurological meetings held by the American Academy of Neurology and the American Clinical Neurophysiology Society, where he presented some of his research work and received an award recognition for his work in the field of epilepsy.

TONY NGUYEN, MD
ORTHOPEDIC SPORTS MEDICINE
Dr. Nguyen is a board-certified and fellowship-trained orthopedic surgeon specializing in sports medicine and trauma. He received his fellowship at Baylor College of Medicine in Houston. During this time, he served as team physician for the Houston Texans, Houston Rockets, Houston Astros and Houston Dynamos, as well as collegiate teams at the University of Houston. Dr. Nguyen completed an orthopedic residency at Cleveland Clinic Foundation and an AO Trauma fellowship program at Linzbruck University Clinic for Trauma Austria. He began his residency at Wayne State University Orthopedics in Detroit, developing his skills in advanced microsurgical techniques and operative fracture management. While in Detroit, he assisted in treating various injuries sustained by professional athletes, including Detroit Pistons' players. Dr. Nguyen earned his medical degree from George Washington University and an undergraduate degree from the University of Virginia.
ALLAN L. ROWLEY, MD
PHYSICAL MEDICINE & REHABILITATION & PAIN MANAGEMENT
Dr. Rowley is board-certified in physical medicine and rehabilitation and fellowship-trained in pain management. After receiving his medical degree from the University of Hawaii, Dr. Rowley completed his residency in physical medicine and rehabilitation at the University of Colorado, Denver, where he was appointed chief resident. He then completed a fellowship in pain management and non-surgical treatment of spine disorders at the University of Michigan. Dr. Rowley specializes in spinal injections and procedures, as well as non-invasive pain management options to diagnose and treat disorders of the neck and back. Dr. Rowley is a pain management physician with the valley's premier multidisciplinary spine care team.

KIRSAT RUBIN, MD
RUDGAR, MD
ENDOCRINOLOGY & METABOLISM
Founder and medical director of Endocrinology, Diabetes & Longevity Center of Arizona, Dr. Rudgar is one of Arizona’s leading experts on all thyroid disorders, diabetes, osteoporosis, metabolic syndrome and poly cystic ovarian disease, as well as men’s and women’s hormones. She is the only integrative endocrinologist in Arizona who specializes in bio-identical hormone replacement and metabolic disorders. She is board-certified in internal medicine, endocrinology and metabolism and geriatric medicine, with more than 15 years of experience. Her comprehensive care includes thyroid ultrasounds and biopsies, nuclear medicine, insulin pump management, continuous glucose monitoring, diabetic retinal screening, IV infusions, medical weight loss and on-site laboratory. Endocrinology, Diabetes & Longevity Center of Arizona is conveniently located 2 miles north of the I-101 and Scottsdale Road, where Dr. Rudgar and her practitioners integrate traditional and nontraditional medicinal therapies to guide patients toward optimum health.

NAMA SALARI, MD
ORTHOPEDIC SURGERY & SPORTS MEDICINE
Dr. Salari has a philosophy that people in pain should not have to wait. He strives to be accessible to his patients and other providers. Dr. Salari is a board-certified, fellowship-trained orthopedic spine surgeon with specialized training in the operative and non-operative treatment of pathologic conditions affecting the spine, including degenerative disc disease, spondylolisthesis, infections, and tumors. He has an expertise in minimally invasive, tissue-sparing approaches that allow for the fastest recovery times and minimize postoperative pain. Dr. Salari graduated with many distinctions and earned membership in the prestigious Alpha Omega Alpha Honor Society while in medical school. He completed his orthopedic surgery residency at Johns Hopkins Hospital, followed by a spine surgery fellowship at Stanford University.

DANIEL RUBIN, MD
NATURAL PATHOLOGY ONCOLOGY
Dr. Rubin is a board-certified naturopathic oncologist. With the goal of creating the most comprehensive and aggressive cancer treatment and prevention plans, Dr. Rubin is an expert in guiding people to safely and effectively integrate natural therapies with their conventional cancer treatment. Dr. Rubin also sees patients wanting to prevent recurrence of their cancer as well as those unable to undergo conventional treatment. A leader in naturopathic oncology, Dr. Rubin was founding president of the Oncology Association of Naturopathic Physicians and actively participates in national efforts regarding naturopathic oncology. In addition, he serves as adjunct oncology faculty to Southwest College of Naturopathic Medicine wherein he educates students as well as Residents. Dr. Rubin has developed a national and international presence by providing services to patients across the United States and in 15 different countries. Dr. Rubin practices at Naturopathic Specialists, LLC, located in the Old Town Scottsdale area.

STEVEN H. WIENER, MD
PLASTIC SURGERY
Certified by the American Board of Plastic Surgery, Dr. Wiener is one of the areas most respected and sought-after plastic surgeons, serving patients from all over Arizona to around the globe. Dr. Wiener and his staff are extensively trained in the newest technologies, and are dedicated to providing the latest techniques and procedures in the art of plastic surgery. The office is one of the most prestigious cosmetic surgery practices in the southwest. Dr. Wiener and his staff's priorities are safety, compassion, and superb results. The office provides a friendly and informative atmosphere focusing on comfort, care, and confidentiality. Surgical procedures include breast enhancement and lifts, mommy makeovers, body contouring, liposuction, abdominoplasty, facial rejuvenation, buttock augmentation and fat transfer to the face, breasts, and buttocks. Additionally, Dr. Wiener is Chief of Plastic Surgery at St. Joseph’s Hospital and Medical Center in Phoenix. Dr. Wiener is recognized as a “Top Doc” by PHOENIX magazine, and is committed to providing an artistic approach to personal enhancement with natural appearing results. Please call our office for a complimentary consultation.

SUSAN WILDER, MD
FAMILY PRACTICE
A perennial “Top Doc” in PHOENIX magazine, Dr. Wilder leads a team of stellar family physicians in a unique patient-centered practice. LifeScape Premier and LifeScape Medical Associates garner international acclaim for its healing office design, healthcare leadership and as a model family practice with a holistic approach to maximizing health and vitality. Patients enjoy one-stop shopping – with expanded office hours including Saturdays – for everything from lab work and X-rays, to psychology, travel medicine and laser skin care. Dr. Wilder and her team of physicians excel at advanced nutritional medicine, natural approaches to mood and hormone disorders, and progressive strategies to minimize risk of heart disease, stroke and cancer. The concierge program fosters close, collaborative doctor-patient alliances, and is guided by the practice mission: “Improve health.”

DEBORAH WILSON, MD
OBSTETRICS/GYNECOLOGY
Dr. Wilson is a nationally recognized expert in advanced minimally invasive surgery and menopausal medicine. Her practice is geared towards women who have completed childbearing and are facing age-related issues. Specifically, bioidentical pellets and other bioidentical hormone therapies as well as vaginal laser therapy are used to reverse the unwarranted changes of menopause such as hot flashes, night sweats, and vaginal dryness. Dr. Wilson teaches laparoscopic hysterectomy nationally to gynecologists and is committed to furthering the notion that almost any gynecologic surgical procedure (including the removal of large fibroid uterus) can and should be performed through small incisions. Dr. Wilson employs a method of safely removing a large uterus without a large incision using a bag to avoid spillage of cells. Returning patients after surgery to their normal activities quickly and safely is her priority.

DECLARATIONS OF INTEREST
The authors declare no conflicts of interest.

Krisanna Gillis, PhD, RDMS, RVT
A certified radiologic technologist and medical sonographer, Krisanna has been a member of the technical teams of LifeScape Premier, LLC, for over 10 years. Krisanna’s research has been published in The American Journal of Preventive Medicine and The American Journal of Medicine. Krisanna is the lead author of several articles in the field of women’s health.

Krisanna is the lead author of several articles in the field of women’s health.

ANDREW WOLIN, MD
PLASTIC SURGERY
Aesthetic plastic surgery performed by doctors certified by the American Board of Plastic Surgery is more than a menu of cosmetic surgical procedures. It is more than the four years of medical school, plus the seven to ten years of postgraduate training. It is more than the rigorous written and oral examinations for board certification. Aesthetic plastic surgery is the melding of art and science within the framework of patient safety and care. Dr. Wolin has been achieving excellent aesthetic surgical outcomes for 30 years, but it is his compassion, dedication and his commitment to the safety of all patients that sets him apart.

VICTOR ZANNIS, MD, FACS
BREAST SURGERY
A surgeon for more than 30 years, Dr. Zannis specializes in breast surgery. He attended Stanford University and UCLA Medical School. After residency training in Phoenix, he became board-certified in general surgery through the American Board of Surgery and is a fellow of the American College of Surgeons. For the last 15 years, Dr. Zannis has sub-specialized full-time in breast care. He served as president of the Phoenix Surgical Society, Southwestern Surgical Congress and the American Society of Breast Surgeons, and is a member of the Society of Surgical Oncology. He recently was published in The American Journal of Surgery: Cancer: Annals of Surgical Oncology; and The Breast Journal on the changing surgical techniques in breast care. Dr. Zannis is a ten-time PHOENIX magazine "Top Doc" honoree.

NATHALIE C. ZEITOUNI, MDCM, FRCP
SKIN CANCER, MOHS & RECONSTRUCTIVE SURGERY
Dr. Zeitouni is section leader of dermatology. Mohs surgery and melanoma with The University of Arizona Cancer Center at Dignity Health St. Joseph’s Hospital and Medical Center specializing in Mohs and reconstructive surgery. She also serves as Professor of dermatology, University of Arizona COM – Phoenix. She is board certified by the American Board of Dermatology and a fellow of the American College of Mohs Surgery. Dr. Zeitouni completed a Mohs micrographic surgery fellowship at the University of Alabama. The Mohs technique is the most effective treatment for the majority of skin cancers by allowing physicians to precisely identify and remove a tumor while leaving the surrounding healthy skin intact. The technique also enables the surgeon to repair the surgical site almost immediately after the procedure.

STEVEN T. ZIERER, MD
GASTROENTEROLOGY
Dr. Zierer earned his medical degree from Indiana University in 1989. He became board-certified in internal medicine after completing his residency at St. Joseph’s Hospital and Medical Center in 1992. He went on to obtain board certification in gastroenterology and hepatology after completing a fellowship at the Good Samaritan Regional Medical Center/Carl T. Hayden VA program in Phoenix in 1994. Dr. Zierer spent an additional fellowship year doing research, obtaining publications, setting up a gastrointestinal motility lab and performing advanced therapeutic endoscopies. He is highly trained in therapeutic ERCP (Iver, bile duct and pancreatic disease) and esophageal disorders (reflux and motility).
