UA College of Medicine – Phoenix Granted Full Accreditation

The UA College of Medicine – Phoenix has been granted full accreditation by the Liaison Committee on Medical Education.
UA Researcher Uses Analytics to Identify Risk of Potentially Inappropriate Prescription Opioid Use

New prediction tools to help health-care providers identify patients at risk of inappropriate prescription opioid use, while allowing safe administration of legitimate pain management to those not at high-risk, are being developed by UA College of Pharmacy researcher Jenny Lo-Ciganic, PhD.

UA Health Sciences’ Summer Programs Designed to Increase Diversity in Health Care

The UA Health Sciences Office of Diversity and Inclusion summer programs seek to recruit and ultimately graduate a more diverse student body dedicated to serving Arizona and the nation’s most at-risk and underserved populations.

UA Research Says H. Pylori Needs Much Closer Attention

Researchers from the UA Mel and Enid Zuckerman School of Public Health conducted a study into whether U.S. physicians consistently adhere to American College of Gastroenterology guidelines for caring for and managing patients with H. pylori infections.

Health Care for the Digital Age: UA College of Nursing Prepares Future Nurses for Careers in Telehealth

Nursing school remains a key area where telehealth technology’s potential remains untapped, and the UA College of Nursing faculty members Rene Love, PhD, and Jane
Carrington, PhD, are about to change that with a recent federally funded project.

UA PTSD Study Seeks Participants to Help Understand and Provide Solutions for Sleep Struggles

Getting a decent night’s sleep is a common struggle among people suffering from post-traumatic stress disorder or PTSD and the lack of sleep can make PTSD symptoms such as anxiety, flashbacks and memory problems even worse.

Targeting Lung Cancer: How Precision Medicine is Directing Cancer Therapy Today

Worldwide, lung cancer causes more cancer-related deaths in men than any other form of cancer and is the second leading cause of cancer death in women.

UA Research Links Sleep Issues with Controlled or Illegal Substances Use among College Athletes

In an analysis of survey data collected from 8,683 student-athletes at U.S. colleges and universities from 2011-2014 show sleep disturbance is strongly related to the use of alcohol, tobacco and illicit drugs.
